

Project Updates

As of March 4, 2022

Helium changes in 4-12 weeks:

- **No more relayed issues**
- **No more syncing issues**
- **Plug in the Hotspot, Connect the external Antenna, and start Mining!**

Helium Hotspot: Great Future

- **Long term business: 50 year business plan**
- **IOT devices will utilize our network**
- **Additional revenue streams**

Helium Hotspot:

**As soon as the Hotspot starts mining,
it will mine 24 hours a day, 365 days a
year.**

**Hotspot makes money (HNT) for you,
Without you doing anything:**

Passive monthly income!

Helium (HNT)

[CryptoCurrencyPricePrediction.com](https://cryptocurrencypriceprediction.com)

June 2022: \$80

Dec. 2022: \$102

Dec. 2025: \$453

Dec. 2030: \$1,278

Planned Redenomination of Helium:

Before:

1 HNT = \$30

After:

1 HNT = 1,000 HNT

\$30 = \$0.03

Redenomination of Helium:

1 HNT at \$30 = 1,000 HNT at \$0.03

Huge upside:

\$0.03 can go up quickly because

People will buy and trade HNT

**If HNT price goes up: the \$30 can
become:**

\$0.10 x 1,000 = \$100

\$0.50 x 1,000 = \$500

\$1.00 x 1,000 = \$1,000

\$2.00 x 1,000 = \$2,000

\$5.00 x 1,000 = \$5,000

To expedite the installation of antennas:

You can NOW install your own antenna, provided:

- **Antenna is 5.8 db minimum**
- **Installed at least 10 ft. from the roofline to maximize line of sight**
- **Bamboo mast is acceptable as long as you have guy wires to hold it from falling due to high winds**
- **Must use minimum equivalent of LMR240 cable**
- **Must install lightning arrester before the rainy season**
